

SOORAJLAL K.G

Senior Full-Stack Developer

Phone: +91 97452 60826 | Email: soorajlalkg@gmail.com | LinkedIn: linkedin.com/in/soorajlalkg | Location: Thodupuzha, Kerala, India
(Currently based in Thiruvananthapuram)

SUMMARY

Backend-focused Full Stack Developer with 10+ years of software development experience, including 5+ years specializing in Node.js and 2+ years of React.js. Experienced in building scalable backend systems, REST APIs, microservices, and cloud-native applications using Node.js, TypeScript, React.js, AWS, Azure, and GCP.

EXPERIENCE

Software Engineer

Spericorn Technology Pvt. Ltd

Aug 2025 – May 2026 • Trivandrum

- Engineered scalable backend services using Node.js, TypeScript, and cloud-native technologies.
- Acted as Team Lead, providing technical guidance and mentoring junior developers.
- Resolved API performance issues by applying caching strategies, streamlining stored procedures, and refactoring backend code, enhancing application responsiveness and scalability.
- Conducted code reviews and promoted coding standards, maintainability, and best practices.
- Partnered with product, design, and engineering teams to translate business requirements into technical solutions.

Lead Software Engineer

Qburst Technologies

Jan 2020 – Aug 2025 • Kochi

- Built and maintained scalable Node.js backend applications, RESTful APIs, and microservices using TypeScript, Express.js, and event-driven architecture.
- Delivered React.js features using Redux Saga and Zustand for state management, producing maintainable frontend workflows integrated with backend APIs.
- Architected microservices and event-driven systems using Kafka, RabbitMQ, AWS SQS/SNS, and Azure messaging services.
- Improved API performance and reduced rate-limit errors by applying mutex locking to control concurrent requests and prevent duplicate or excessive API calls.
- Created reusable common logic for multi-region applications, reducing code duplication and simplifying maintenance while supporting region-specific requirements.
- Led development teams, mentored engineers, and established coding standards, best practices, and production-support processes.

Software Programmer

Bridge Global

Jul 2017 – Jan 2020 • Kochi

- Maintained and strengthened scalable PHP backend applications for web-based business solutions.
- Formulated backend features with a focus on performance, maintainability, and clean architecture.
- Worked closely with development teams to troubleshoot issues, enhance existing applications, and deliver new features.

SKILLS

Backend

Node.js Express.js
NestJS REST APIs
GraphQL Microservices

Architecture & Messaging

Event-Driven Architecture Kafka
RabbitMQ

Frontend

React.js Redux Saga
Zustand HTML5
CSS3

Databases

PostgreSQL MySQL
SQL Server MongoDB
DynamoDB

Caching

Redis

AWS

EC2 S3
Lambda API Gateway
SQS SNS
RDS ECS Fargate
ECR SES
SAM

Azure

Azure Functions Event Hubs
Service Bus Storage Accounts

GCP

Cloud Run Compute Engine
Cloud Storage Cloud SQL
Firestore Pub/Sub

DevOps

Docker Kubernetes (Basics)
GitHub Actions Jenkins
CI/CD Git

Languages

JavaScript TypeScript
PHP SQL

Software Programmer

Agileblaze Technologies

Nov 2014 – May 2017 • Kochi

- Produced dynamic, responsive web applications using PHP, jQuery, HTML, and CSS.
- Delivered and enhanced application features based on business and client requirements.
- Partnered with clients and development teams to gather requirements and translate them into technical solutions.

Junior Software Programmer

ALT-D Technologies

Jul 2013 – Nov 2014 • Kochi

- Built and customized PHP-based web applications and WordPress solutions based on client requirements.
- Configured CMS features and customized WordPress functionality to support business needs.
- Worked alongside senior developers to deliver client-specific web solutions.

PROJECTS

LINE Marketing Campaign Tool

React.js, Node.js, TypeScript, Azure Functions, SQL Server, Service Bus, Event Hub

- Created a marketing automation platform for the LINE ecosystem integrated with Salesforce Marketing Cloud.
- Established campaign workflows for personalized messaging, audience segmentation, rich menu management, and performance tracking.
- Enabled real-time synchronization between LINE events and marketing systems.

Webhook-based Follow/Block Tracker

Node.js, TypeScript, Azure Functions, Azure Event Hub

- Engineered an event-driven platform to capture LINE follow/block events and sync audience data with Salesforce Marketing Cloud in real time.
- Automated Data Extension updates for accurate segmentation and personalized campaigns.

Ecommerce CMS Platform

React.js, Node.js, TypeScript, MySQL, GraphQL, AWS, S3, Docker

- Devised a scalable CMS platform for managing dynamic content across web and mobile applications, with multi-country, multi-brand, and multilingual capabilities.
- Produced reusable React.js components and Node.js backend services using GraphQL.
- Containerized application services using Docker and integrated AWS S3 for content and asset management.

Order History Service for Ecommerce

Node.js, TypeScript, Kafka, DynamoDB

- Constructed a Node.js microservice for processing e-commerce order events using Kafka, maintaining a read-optimized order history in DynamoDB.
- Created REST APIs for customer order-history retrieval and streamlined read operations.
- Added retry mechanisms, Dead Letter Queue (DLQ) handling, and idempotent consumers to strengthen event-processing reliability and prevent duplicate records.

MessageHub — Serverless Message & Click Tracking Platform

React.js, Node.js, TypeScript, AWS Lambda, API Gateway, SES, SNS, SQS, DynamoDB, AWS SAM

- Architected a serverless, event-driven messaging and click-tracking platform for high-volume campaign delivery and real-time analytics.
- Engineered Node.js Lambda functions and asynchronous workflows using AWS SNS and SQS for scalable message processing; built React.js interfaces for campaign management and analytics.
- Automated clickstream processing and campaign reporting using event-driven workflows; used AWS SAM to define and deploy serverless infrastructure.

Account Platform Modernization & Architecture Revamp

Node.js, Express.js, TypeScript, MySQL, AWS

- Led the migration of a legacy PHP account platform to Node.js and TypeScript, modernizing the backend architecture and reducing technical debt.
- Established a modular, reusable architecture with region-specific services to support multiple markets.
- Improved maintainability and scalability through reusable service components and standardized development patterns.

Private Credit Syndication Platform

Node.js, Express.js, React.js, TypeScript, PostgreSQL, AWS, S3, SES, ECS, ECR

- Formulated and delivered a fintech platform supporting deal management, investor onboarding, capital allocation, and repayment tracking.
- Created scalable REST APIs and backend services using Node.js, Express.js, and TypeScript; delivered React.js features for investor and deal-management workflows.
- Deployed containerized applications using AWS ECS and ECR, with supporting services including S3 and SES.

SEO Analytics & Marketing Dashboard

React.js, Node.js, Nest.js, TypeScript, Google APIs, PostgreSQL, MongoDB, AWS, S3

- Created a SaaS platform that unified SEO, Google Analytics, and Google Ads insights into a single dashboard.
- Built multi-project integrations, subscription management, and secure data synchronization to enable KPI tracking, customer onboarding, and scalable growth.
- Integrated an AI-powered chat assistant (Python ML/AI APIs) enabling users to query performance metrics and receive optimization recommendations in natural language, with MongoDB used to persist chat session history.

EDUCATION

B.Tech in Information Technology

MG University College of Engineering, Thodupuzha

2008 – 2012
